• About Me

I'm Ramindu Sulakkana, a passionate technologist with a keen interest in data analysis and visualisation. I enjoy transforming raw data into clear, meaningful insights using modern tools and techniques. With a growing foundation in AI, data engineering, and cloud architecture, I'm focused on building scalable, data-driven solutions that make an impact.

Skills

• Programming languages

• Java, R ,Python, C++, Mern Stack, C ,
Rust,TypeScript, NoSQL

• Data Analytics tools

PowerBi, Tableau ,Apache Hadoop

• Cloud Tools

Azure , Aws,

Efficient Knowledge for the Docker ,
Kubernetes, Data Warehousing, ETL
Process, Data Pipelines, Sql

Education

Bachelor Hons Information Technology Specializing Data Science

2024 - Present

Sri Lanka Institute of Information Technology The Data Science program at SLIIT equips students with a strong foundation in statistics, programming, and data analytics. It focuses on real-world problem-solving through machine learning, data visualization, and big data technologies. Students gain hands-on experience using tools like Python, R, SQL, and Power BI, while also exploring AI, cloud computing, and data-driven decision making in both academic and industry settings.

A practical program focused on enhancing professional communication skills in business contexts. Covers business writing, presentations, formal emails, negotiation, and workplace communication. Emphasizes fluency, clarity, and confidence in English for professional environments.

Online Profiles

 GitHub :- <https://github.com/dmrs2003>

 LinkedIn :- <https://www.linkedin.com/in/ramindu-sulakkana-737978317/>

projects

1) Plant Disease Detection–

Built a Streamlit web app using MobileNetV2 to classify 26 plant diseases from images with ~89% accuracy, providing real-time predictions with confidence scores.

2) Car Service & Maintenance Tracker-

Developed a Java Servlet-based web application to manage vehicle service records using Linked Lists and file handling, with features for admin management and service history tracking.

3) Food Ordering System-

Developed a full-stack web application using Spring Boot and MySQL to manage online food orders, including user authentication, menu management, and order processing.

Certifications

- Certification in Python
- Data Manipulation In Sql
- Understanding Power BI
- Expertise in pandas Numpy
- Certifications In Data Security
